

CodePulse

Hi-Fidelity Mockup Prompt Document

For use with Google Stitch • Design Language v1.0 • March 2026

This document contains screen-by-screen prompt instructions, a design system specification, and component guidelines to generate pixel-perfect hi-fi mockups.

Part 1 — How to Use This Document with Google Stitch

Google Stitch is an AI-powered UI generation tool that converts natural language prompts into high-fidelity mockups. Paste each screen's prompt block verbatim into Stitch, preceded by the Global Design System prompt (Section 2). For best results, always send the design system prompt first in the session before generating any individual screens.

NOTE Always paste the GLOBAL CONTEXT prompt (Part 2) into Stitch before generating any individual screen. This seeds the design language and ensures visual consistency across all frames.

Workflow

- Open Google Stitch and start a new project named 'CodePulse — Web App'.
- Paste the Global Design System prompt from Part 2 as your first message.
- Then paste each screen prompt from Part 3 one at a time, in order.
- After each screen is generated, annotate with the component notes in Part 4.
- Export all frames as PNG at 1x and 2x for handoff.

Part 2 — Global Design System & Language

The following defines the complete visual language for CodePulse. Reference this whenever describing any screen. This system is inspired by modern developer-tool design (Linear, Vercel, Supabase) — clean, data-dense, trustworthy, and energetic.

2.1 Brand Identity

Brand name	CodePulse
Tagline	Code together. Grow together.
Personality	Focused, motivating, developer-native, modern
Visual mood	Dark-capable, clean, data-forward, slightly energetic
Target users	CS students aged 18–28
Platform	Web (desktop-first, 1440px canvas)

2.2 Colour Palette

Pulse Blue #1A56FF Primary / CTA	Deep Navy #0A1628 Page Background	Surface #111827 Card / Panel bg
Surface Raised #1F2937 Elevated cards	Sky #0EA5E9 Link / Info accent	Emerald #10B981 Success / Goal met
Amber #F59E0B Warning / Reminder	Red #EF4444 Error / Danger	Border #374151 Dividers / Outlines
Text Secondary #9CA3AF Labels / Captions	Text Primary #F9FAFB Body / Headings	White #FFFFFF Inverse surfaces

NOTE CodePulse uses a dark-mode-first design. All backgrounds default to the navy/surface palette. Do NOT use white page backgrounds unless specified as a light-mode variant.

2.3 Typography Scale

Font family	Inter (sans-serif) — available on Google Fonts
Display / Hero	Inter Bold • 48–64px • Letter spacing: -2%
H1 — Page title	Inter SemiBold • 32px • Letter spacing: -1%
H2 — Section	Inter SemiBold • 24px • Letter spacing: -0.5%
H3 — Card title	Inter Medium • 18px • Letter spacing: 0%

Body / Default	Inter Regular • 14px • Line height: 1.6
Caption / Label	Inter Regular • 12px • Color: Text Secondary
Code / Monospace	JetBrains Mono • 13px • Color: Sky (#0EA5E9)
Number / Stat	Inter Bold • 28–48px • Tabular nums: on

2.4 Spacing & Grid

Grid system	12-column grid at 1440px canvas width
Gutter	24px between columns
Outer margin	64px left and right
Base unit	4px — all spacing is a multiple of 4
Common spacings	4 / 8 / 12 / 16 / 24 / 32 / 48 / 64 / 96px
Sidebar width	240px (fixed, collapsible)
Content max-width	1200px centered

2.5 Core Component Rules

Buttons

- **Primary:** Pulse Blue fill (#1A56FF), white label, 8px radius, height 40px, padding 16px horizontal, Inter SemiBold 14px.
- **Secondary:** Transparent fill, 1px solid border (#374151), white label. Use for non-critical actions.
- **Danger:** Red fill (#EF4444) for destructive actions (remove member, delete goal).
- **Ghost/Link:** No border or fill, Sky colour text (#0EA5E9). For tertiary actions.
- Button states: default / hover (8% lighter fill) / focus (2px Pulse Blue outline offset 2px) / disabled (30% opacity, no pointer events).

Cards

- Background: Surface (#111827). Border: 1px solid #374151. Border-radius: 12px.
- Padding: 20px all sides. Subtle box-shadow: 0 1px 3px rgba(0,0,0,0.4).
- Hover state on interactive cards: border colour shifts to Pulse Blue (#1A56FF) with a faint 0 0 0 3px rgba(26,86,255,0.15) outer glow.

Inputs & Form Fields

- Background: #0A1628. Border: 1px solid #374151. Border-radius: 8px. Height: 40px. Padding: 0 12px.
- Focus state: 1px solid Pulse Blue + 0 0 0 3px rgba(26,86,255,0.2) glow.

- Label: Inter Medium 12px, #9CA3AF, 6px above the input.
- Error state: 1px solid Red (#EF4444). Helper text in Red below the field.

Badges & Status Pills

- Pill shape: border-radius 999px, height 22px, padding 0 10px, font 11px SemiBold.
- [Active / Met]: Emerald bg (#D1FAE5 tint at 15% opacity), Emerald text (#10B981).
- [Pending]: Amber bg tint 15%, Amber text (#F59E0B).
- [Missed]: Red bg tint 15%, Red text (#EF4444).
- [Language tag]: Pulse Blue bg tint 15%, Blue text (#1A56FF).

Data Visualisation (Charts)

- Library style: Recharts / minimal bar charts. Background: transparent. Grid lines: #1F2937, 1px dashed.
- Bar fill: Pulse Blue (#1A56FF) for self, Sky (#0EA5E9) for others.
- Axis labels: 11px Inter Regular, #9CA3AF. Tooltips: Surface Raised card, white text, 8px radius.
- Always include a legend when more than one data series is present.

Navigation Sidebar

- Width: 240px. Background: #0D111C (slightly darker than page). Border-right: 1px solid #1F2937.
- Logo at top, 24px padding. Nav items: 40px height, 12px radius on hover/active, 14px Inter Medium.
- Active item: Pulse Blue bg tint (#1A56FF at 12%), left 3px solid Pulse Blue accent bar, white label.
- Inactive item: #9CA3AF label, no bg. Hover: #1F2937 bg, white label.
- Bottom of sidebar: user avatar, display name, settings link.

2.6 Global Context Prompt — Paste This First in Stitch

GLOBAL DESIGN SYSTEM PROMPT

You are generating hi-fi UI mockups for CodePulse, a group coding accountability web app for CS students. Apply this design system to every screen you generate:

VISUAL STYLE: Dark-mode first. Clean, modern, developer-native. Inspired by Linear, Vercel, and Supabase dashboards.

COLOURS:

Background page: #0A1628 (Deep Navy)

Surface / Card: #111827
Surface Raised: #1F2937
Border: #374151 (1px solid)
Primary CTA: #1A56FF (Pulse Blue)
Accent / Link: #0EA5E9 (Sky)
Success: #10B981 (Emerald)
Warning: #F59E0B (Amber)
Error: #EF4444 (Red)
Text primary: #F9FAFB
Text secondary: #9CA3AF

TYPOGRAPHY: Inter for all UI text. JetBrains Mono for code/data.

Page title: 32px SemiBold. Section: 24px SemiBold.

Body: 14px Regular. Caption: 12px Regular.

LAYOUT: 1440px desktop canvas. 12-column grid. 64px outer margin.

Sidebar: 240px fixed left. Content area: 1200px max-width.

COMPONENTS: Cards have 12px radius, 1px border, 20px padding.

Buttons: 40px height, 8px radius, 16px horizontal padding.

Inputs: 40px height, 8px radius, dark bg.

All interactive elements have visible hover and focus states.

ICONS: Use Lucide icons (stroke style, 20px default, #9CA3AF inactive, #F9FAFB active).

DATA: Use realistic placeholder data – student names, coding durations, programming languages (Python, JavaScript, Java, C++, Dart).

WakaTime-style time format: e.g. '3 hrs 42 mins'.

Part 3 — Screen-by-Screen Stitch Prompts

Paste each block below into Google Stitch after the global context prompt. Prompts are written to maximise layout specificity and design fidelity.

SCREEN 01 Landing / Login Page

The first screen a user sees. Should communicate value instantly and drive Google sign-in.

SCREEN 01 – LANDING & LOGIN

Design a full-screen landing page for CodePulse (1440 x 900px desktop).
Apply the CodePulse dark design system defined above.

LAYOUT: Centred two-column layout.

Left column (55%): Marketing hero content.

Right column (45%): Login card, vertically centred.

LEFT COLUMN CONTENT:

- CodePulse wordmark logo top-left (24px Inter Bold, Pulse Blue).
- Hero headline (48px Inter Bold, white, tight leading):
'Code More. Together.'
- Sub-headline (18px Regular, #9CA3AF):
'Track your real coding hours with WakaTime, compete with friends, and hit your goals with smart SMS reminders.'
- Three feature pills below (horizontal row, pill-shaped chips):
[Real WakaTime Data] [Group Leaderboard] [Smart Reminders]
Chips: #1F2937 bg, Pulse Blue left icon dot, 12px Regular text.
- Subtle animated grid/dot background (#1F2937 dots on #0A1628).

RIGHT COLUMN CONTENT (login card):

- Card: #111827 bg, 12px radius, 1px border #374151, 40px padding.
- Title: 'Welcome back' – 24px SemiBold, white.
- Subtitle: 'Sign in to your CodePulse account' – 14px, #9CA3AF.
- Divider: thin #374151 line.
- Google SSO button: full-width, 44px height, white bg, #111827 text, Google colour logo on left, 'Continue with Google', 8px radius.
- Separator: '– or –' in #9CA3AF.
- Note text (12px #9CA3AF): 'Don't have an account? Signing in with Google automatically creates one.'
- Padlock icon + 'Secured by Supabase Auth' – 11px, #4B5563.

FOOTER: Full width, #0D111C bg, 'Made for CS students. v1.0' centred, 12px #4B5563.

SCREEN 02 WakaTime Onboarding Flow

3-step guided flow after first login. Shows progress, instructions, and connects the WakaTime API key.

SCREEN 02 – WAKATIME ONBOARDING (STEP 2 OF 3: CONNECT API KEY)

Design an onboarding flow screen for CodePulse. This is Step 2 of 3. Apply the CodePulse dark design system.

LAYOUT: Centred single-column, max-width 560px, vertically centred on the page. Page bg: #0A1628.

TOP: Step indicator – horizontal stepper, 3 steps.

Step 1 'Create Account': completed checkmark, Emerald (#10B981).
Step 2 'Connect WakaTime': active, Pulse Blue filled circle with '2'.
Step 3 'Join a Group': upcoming, grey circle.
Connector lines between steps: thin line, Emerald for done, #374151 for upcoming.

CARD CONTENT (below stepper):

- Icon: WakaTime logo placeholder (orange clock icon) – 48px centred.
- Title: 'Connect your WakaTime account' – 24px SemiBold.
- Body text: 'Paste your WakaTime API key below. Find it at wakatime.com/settings/account under API Key.'
- Inline link: 'wakatime.com/settings' – Sky blue, underline.
- API Key input field: full width, monospace font (JetBrains Mono), placeholder: 'xxxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx', Eye icon on right to toggle visibility, #1A56FF focus ring.
- Helper: '12px #9CA3AF – Your key is encrypted and stored securely.' with a padlock icon.
- CTA button: full-width, 44px, 'Connect WakaTime' – Primary Blue.
- Secondary link: 'Skip for now' – Ghost/Link style, Sky colour.

BELOW CARD: Collapsible 'How to find your API key' accordion section.
Closed state shown. Chevron icon right, title in #9CA3AF.

SCREEN 03 Group Dashboard — Leaderboard

The main authenticated screen. Shows the group leaderboard, bar chart comparison, and member cards.

SCREEN 03 – GROUP DASHBOARD (LEADERBOARD VIEW)

Design the main authenticated dashboard for CodePulse at 1440px wide.
Apply the full CodePulse dark design system.

LAYOUT:

- Left: 240px dark sidebar (nav).
- Right: main content area, 64px top padding.

SIDEBAR (240px, #0D111C, 1px right border #1F2937):

- Logo: 'CodePulse' wordmark, 16px Bold, Pulse Blue. 24px padding.
- Nav items (top to bottom, Lucide icons left, 14px Medium):
 - [Dashboard] – active (Pulse Blue tint bg, Blue accent left bar)
 - [My Goals]
 - [Group Settings]
 - [Notifications]
- Bottom: user avatar (32px circle, initials fallback), display name (14px white), role badge 'Member' (12px, grey pill).

Settings gear icon top-right of avatar area.

MAIN CONTENT AREA HEADER:

- Page title: 'Group Dashboard' – 32px SemiBold.
- Subtitle: 'AlgoBeasts – 6 members active' – 14px #9CA3AF.
- Right-aligned: Time filter tabs [Today] [This Week] [This Month].
'This Week' tab active: Pulse Blue bg, white text, 8px radius.
Others: ghost/outline style.

STATS ROW (4 cards, full width, equal columns):

- Card 1 – Your Time: '3 hrs 42 mins' big stat, '#1 This Week' badge Emerald.
 - Card 2 – Group Total: '24 hrs 18 mins', small up arrow +12% vs last week.
 - Card 3 – Top Language: Python logo icon + 'Python', '41% of your time'.
 - Card 4 – Goals Met: '2 / 3', progress ring (circular), Emerald fill.
- Each card: #111827 bg, 12px radius, 20px padding, 1px border.

BAR CHART SECTION (full width card below stats):

- Title: 'Coding Time Comparison – This Week'.
- Bar chart: 6 members on X axis, hours on Y axis.
- Bars: Pulse Blue for current user, Sky (#0EA5E9) for others.
- Grid lines: dashed #1F2937. Axis labels: 12px #9CA3AF.
- Tooltip visible on one bar: Surface Raised card, member name + time.

LEADERBOARD TABLE (card below chart):

- Header row: Rank / Member / Today / This Week / Top Language / Goals.
- 6 data rows. Current user row has subtle Pulse Blue left border highlight.
- Rank 1: gold medal emoji. Rank 2: silver. Rank 3: bronze.
- Each row: member avatar (32px circle), display name, coded times, language badge (e.g. [Python] pill, Pulse Blue tint).
- Goal column: show pill – [Met] Emerald or [Pending] Amber.
- Row hover: #1F2937 bg.

Realistic sample data for 6 members:

1. Kwame A. – 3h42m / 14h20m / Python / Met
2. Ama O. – 2h15m / 12h05m / JavaScript / Pending
3. Nana K. – 1h58m / 10h40m / Java / Met
4. Abena M. – 1h30m / 9h15m / C++ / Pending
5. Kofi B. – 0h55m / 6h30m / Dart / Missed
6. Efua S. – 0h20m / 4h10m / Python / Missed

SCREEN 04 My Goals

Personal goal tracking page. Users see current goals, progress, and can create new ones.

SCREEN 04 — MY GOALS PAGE

Design the 'My Goals' page for CodePulse using the same sidebar layout. Apply the full CodePulse dark design system.

SIDEBAR: Same as Screen 03. 'My Goals' nav item is now active.

MAIN CONTENT:

Page title: 'My Goals' — 32px SemiBold.

Subtitle: 'Track and manage your personal coding goals.' — #9CA3AF.

Right-aligned: '+ New Goal' button — Primary Blue, 40px, Lucide Plus icon.

ACTIVE GOALS SECTION (H2: 'Active Goals'):

Three goal cards in a 3-column grid.

Goal Card 1 — MET:

Title: 'Code in Python for 1 hour' — 16px SemiBold.

Badge: [Met] — Emerald pill top-right.

Progress bar: full width, Emerald fill at 100%, 8px height, 4px radius.

Stats row: 'Logged: 1h 22m | Target: 1h | Deadline: Today'.

Footer: Emerald checkmark icon + 'Goal achieved!'

Goal Card 2 — IN PROGRESS:

Title: 'Code for 2 hours total today' — 16px SemiBold.

Badge: [In Progress] — Amber pill.

Progress bar: Pulse Blue fill at 65%, with animated pulse shimmer.

Stats row: 'Logged: 1h 18m | Target: 2h | Deadline: Today 11:59pm'.

Footer: clock icon + 'SMS reminder set for 9:00 PM'.

Goal Card 3 — MISSED:

Title: 'Code in Java for 30 mins' — 16px SemiBold.

Badge: [Missed] — Red pill.

Progress bar: Red fill at 20%, 8px height.

Stats row: 'Logged: 6m | Target: 30m | Deadline: Yesterday'.

Footer: Red X icon + 'Deadline passed. Try again tomorrow.'

NEW GOAL MODAL (shown as overlay, dimmed backdrop):

Card: 480px wide, centred, #111827, 12px radius, 32px padding.

Title: 'Create New Goal' — 20px SemiBold.

Form fields (vertical stack, 16px gap):

1. Language (optional): dropdown — 'Any Language / Python / JS / Java...'
 2. Duration: number input + unit selector (mins / hours) side by side.
 3. Deadline: radio group — [Daily] [Weekly].
 4. SMS Reminder: toggle switch ON (Pulse Blue), label 'Send reminder'.
- Buttons row: [Cancel] secondary [Create Goal] primary.

PAST GOALS SECTION (H2: 'Past Goals – This Month'):
Compact table: Goal name / Language / Status / Date.
3 rows of past goals. Alternating row bg (#0A1628 and #111827).

SCREEN 05 Group Settings (Admin View)

Admin-only page to manage group members, copy the group ID, and remove members.

SCREEN 05 – GROUP SETTINGS (ADMIN VIEW)

Design the Group Settings page for CodePulse. Same sidebar layout.
Apply the full CodePulse dark design system.
'Group Settings' nav item is active in the sidebar.

MAIN CONTENT:

Page title: 'Group Settings' – 32px SemiBold.
Subtitle: 'Manage your group: AlgoBeasts' – #9CA3AF.
Admin badge next to title: [Admin] – Pulse Blue pill, 12px.

SECTION 1 – GROUP INFO (card):

Group name: editable inline – 'AlgoBeasts' 20px SemiBold + pencil icon.
Group ID field: read-only input showing 'CP-7X9QM2' in JetBrains Mono.
Right of field: [Copy ID] secondary button + Lucide copy icon.
Helper: '12px #9CA3AF – Share this ID with anyone you want to invite.'

SECTION 2 – MEMBERS (card):

Table header: Member / Joined / WakaTime / Role / Actions.
6 rows. Columns:
Member: avatar + display name + email (12px grey).
Joined: relative date e.g. '3 days ago'.
WakaTime: [Connected] Emerald pill or [Not connected] grey pill.
Role: [Admin] Blue pill or [Member] grey pill.
Actions: [Remove] – Red ghost button, small, Lucide trash icon.
Current admin row (Kwame A.): no Remove button, [You] label instead.

REMOVE MEMBER CONFIRMATION (inline warning below a row):

Show for 'Kofi B.' row: amber inline alert – Lucide warning icon +
'Are you sure you want to remove Kofi B.? This cannot be undone.'
[Cancel] ghost [Yes, Remove] Red danger button – side by side.

SECTION 3 – DANGER ZONE (card, Red tint border #EF4444 at 30% opacity):

Title: 'Danger Zone' – Red text.
'Disband Group' – described as irreversible, Red secondary button.
Padding matches other cards but border is Red-tinted.

SCREEN 06 Mobile View — Dashboard (375px)

Responsive mobile view of the leaderboard dashboard for reference. Not the primary target but important for completeness.

SCREEN 06 — MOBILE DASHBOARD (375PX WIDE)

Design the mobile (375px wide) version of the CodePulse dashboard.
Apply the dark CodePulse design system.

LAYOUT: Single column. No sidebar (sidebar becomes a bottom nav bar).

TOP BAR: 56px height, #0D111C bg, 'CodePulse' wordmark left,
hamburger menu icon right (Lucide Menu, 24px, white).

BOTTOM NAV BAR: 64px height, #0D111C, border-top 1px #1F2937.
4 icons centred: [Dashboard] [Goals] [Group] [Profile].
Active icon: Pulse Blue, label below in 10px. Others: #9CA3AF.

CONTENT (scrollable):

Page title: 'Group Dashboard' — 22px SemiBold, 16px padding.
Time filter: horizontal scroll tabs [Today][This Week][This Month].

STATS: 2x2 grid of mini stat cards.

Card bg: #111827. Each: icon top-left, stat number 24px Bold,
label 11px #9CA3AF. Gap: 8px.

LEADERBOARD: Vertical stack of member cards (not a table).

Each card: rank number left (20px Bold), avatar (36px),
name + top language badge, time right-aligned.
Current user card: subtle Pulse Blue left border 3px.
Card padding: 12px. Gap between cards: 8px.

BAR CHART: Full width, 200px height. Horizontal bars (not vertical)
work better on mobile — 6 members, label left, bar right, time at end.

Part 4 — Component Annotation Guide

After generating each screen in Stitch, add the following annotations as comment layers or sticky notes to communicate intent to developers.

4.1 Interaction States to Annotate

- **Buttons:** Always annotate Default, Hover, Focus, Loading, and Disabled states separately.
- **Inputs:** Annotate Default, Focus (glow ring), Error (red border + helper), and Filled states.
- **Cards:** Note hover state (blue border shift) separately from default state.
- **Leaderboard rows:** Show hover state (surface raised bg) and active/self-highlight state.
- **Progress bars:** Note that the 'In Progress' bar has an animated shimmer — specify CSS animation.

4.2 Accessibility Notes

- All text on dark backgrounds must meet WCAG AA contrast (4.5:1 for body, 3:1 for large text). Verify with a contrast checker.
- All interactive elements require a visible keyboard focus ring (2px Pulse Blue outline, 2px offset).
- Icon-only buttons (e.g. copy, trash) must include an aria-label attribute for screen readers.
- Colour is never the sole indicator of state — always pair colour with an icon or text label.

4.3 Motion & Animation Tokens

Transition duration	150ms for micro-interactions (hover, focus)
Transition easing	ease-out for entrances, ease-in for exits
Page transitions	200ms fade-in on route change
Progress bar shimmer	1.5s linear infinite shimmer animation
Modal backdrop	150ms opacity 0 → 0.6 ease-out
Toast notifications	300ms slide-up from bottom, 200ms fade-out

4.4 Icon System

- Library: Lucide Icons (open source, MIT). Stroke weight: 1.5px. Default size: 20px.
- Active/primary context: #F9FAFB (white). Inactive/secondary: #9CA3AF. Destructive: #EF4444.
- Never use filled icons — always use the stroke (outline) variant for visual consistency.

Part 5 — Stitch Export & Handoff Checklist

Use this checklist before sharing the Stitch file with the development team.

Screen count	6 screens generated (Screens 01-06)
State coverage	Each screen shows at least 1 interactive state variant
Export format	PNG @ 1x and 2x, plus Figma-compatible SVG for components
Colour tokens	All hex values match the palette in Section 2.2
Typography	All text uses Inter; code uses JetBrains Mono
Spacing	All spacing is a multiple of 4px
Mobile screen	Screen 06 at 375px is included
Annotations	All screens annotated per Part 4 guidelines
Accessibility	Contrast ratios verified for all text/bg combinations
Naming convention	Frames named: CP-01-Login, CP-02-Onboarding, CP-03-Dashboard, etc.

End of Prompt Document — CodePulse Design Language v1.0
